SRO officer will depend on junior high facility. If it is combined with high school, one full time should be sufficient.   At the high school, I feel we have adequate safety measures.   It would be beneficial for intermediate campus to have access to school resource officer for truancy issues.   I don't feel like security cameras are worth the extra money simply due the the fact that most incidents that we would like to view are not in areas where cameras would be allowed. Ex: locker room, bathroom, etc.   Administrators should be allowed to carry weapons but are often not on campus. Hiring ENOUGH r   ...
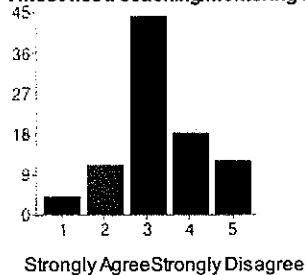

Professional Development

I most need coaching/mentoring to improve instructional design?

My best experiences with training have been from other DISD teachers rather than the service center or someone coming in from outside. It would be great to collaborate with other teachers and find what they do for various activities and classroom management strategies at different levels.   Hire an advisor for Daily Five guided reading.

Other schools have this to add teachers in getting going with guided reading instead of being thrown in cold turkey.   This section does not apply to my area as well as to classroom teachers. I enjoy staying informed of the latest evidence based practices.   Doesn' ...
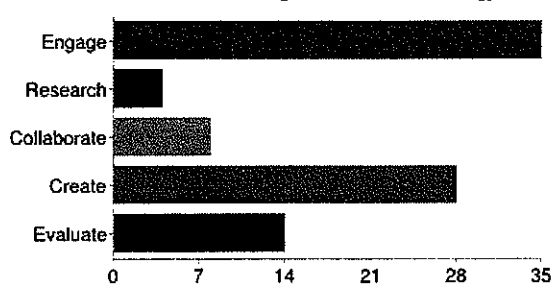

Instructional Technology

I use instructional technology most in the classroom to

I am most interested in learning how to use technology to

Engage	35	39%
Research	4	4%
Collaborate	8	9%
Create	28	31%
Evaluate	14	16%

Please add any additional comments below.

I use technology to engage, research, collaborate, create and evaluate. Technology is seamlessly integrated in my classroom.   I would like access to more technology in my classroom. The iTouches aren't appropriate for all activities we do in class. It would be great to have iPads or MacLites because they are easier to manage with the sts., monitoring what they are doing, and have printing capability.

I find if I give a technology assignment, some students work well and learn, some are trying to sneak around to play games and or chat, and some take forever to complete. It is hard to have them   ...

- It would be great to have an officer at each campus, or at least one that could be split between two campuses.
- Would be nice to ensure each classroom has mini blinds, as we are asked to close them for intruder drills. More frequent drills.
- Not carry a weapon on them but have a locked safe in the classroom/office so that if it is needed one can be obtained easily.
- The district might consider having a military person on each campus. This could actually be part of their job....
- I think it would be great if everyone had to pass through a metal detector (patrolled by an officer) before entering at each campus. This would ensure that our students could not bring guns/knives into the school. I also think it would be a great safety measure to discontinue the use of lockers within the schools. 80-90% of school violence occurs when kids are at their lockers in passing and in the changing/locker rooms. I believe that locker rooms should be supervised by adult school personnel as well as the restrooms.
- I strongly believe that admin and teachers should be allowed to carry concealed weapons.
- It would be beneficial for intermediate campus to have access to school resource officer for truancy issues.
- Is the school going to carry the liability of the person who carries the gun?
- I think it is a good idea for some teachers to carry a concealed weapon. I realize that they would have to go through concealed handgun training, but I think past behaviors and attitudes should also be taken into consideration. We don't want people with "quick tempers" carrying a weapon.
- I don't feel like security cameras are worth the extra money simply due to the fact that most incidents that we would like to view are not in areas where cameras would be allowed. Ex: locker rooms, bathrooms, etc.
- Administrators should be allowed to carry weapons but are often not on campus. Hiring ENOUGH resources officers to cover all campuses would be a large expense for something we might not ever need.
- There needs to be a security officer at each campus full time.
- I refuse to answer the first two questions.
- The cameras that are in place need to work.
- SRO officer will depend on junior high facility. If it is combined with high school, on full time should be sufficient.
- At the high school, I feel we have adequate safety measures.
- I do believe that before entering the school there ought to be a locked area that no one can enter unless they buzz, and the door lock is then released and you may enter the main office.

Then you can enter your name in to the computer system, a security check is done and then if you pass, a stick on id is produced, it is placed where visible, then you may go into the building to carry on your visit, or business. I have visited a school in Rockwall and that is how they are monitoring. It was very impressive.

- I feel better security for entering and exiting buildings.
